Experiment -1

Car Booking Reservation System Using Zoho One (SaaS)

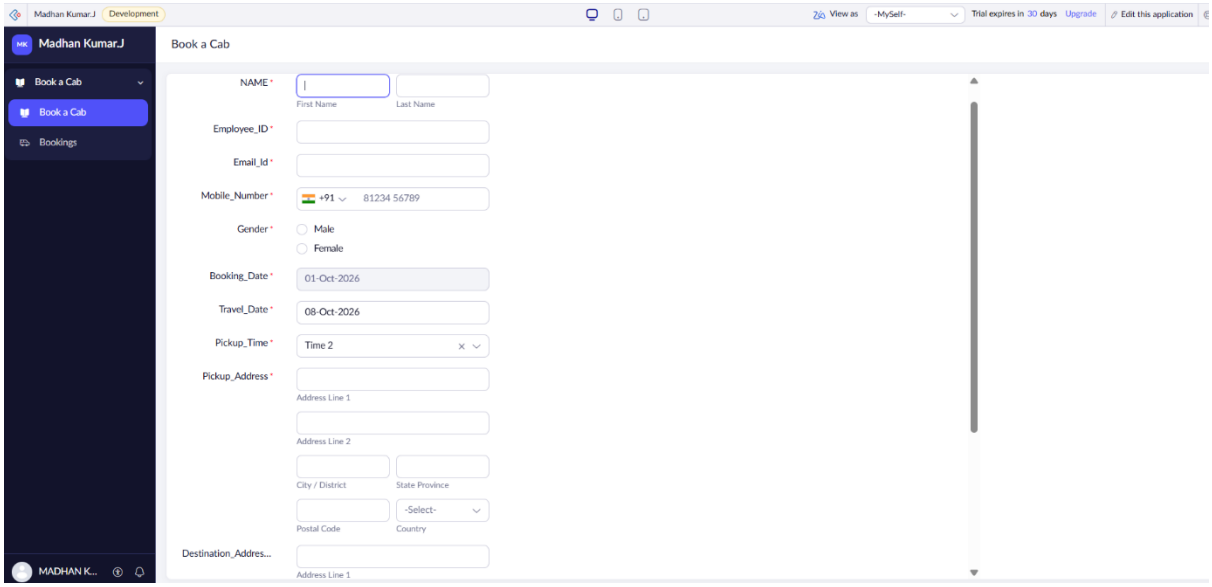

Aim

To create a **Car Booking Reservation System** using **Zoho One** as a cloud-based Software as a Service (SaaS) application.

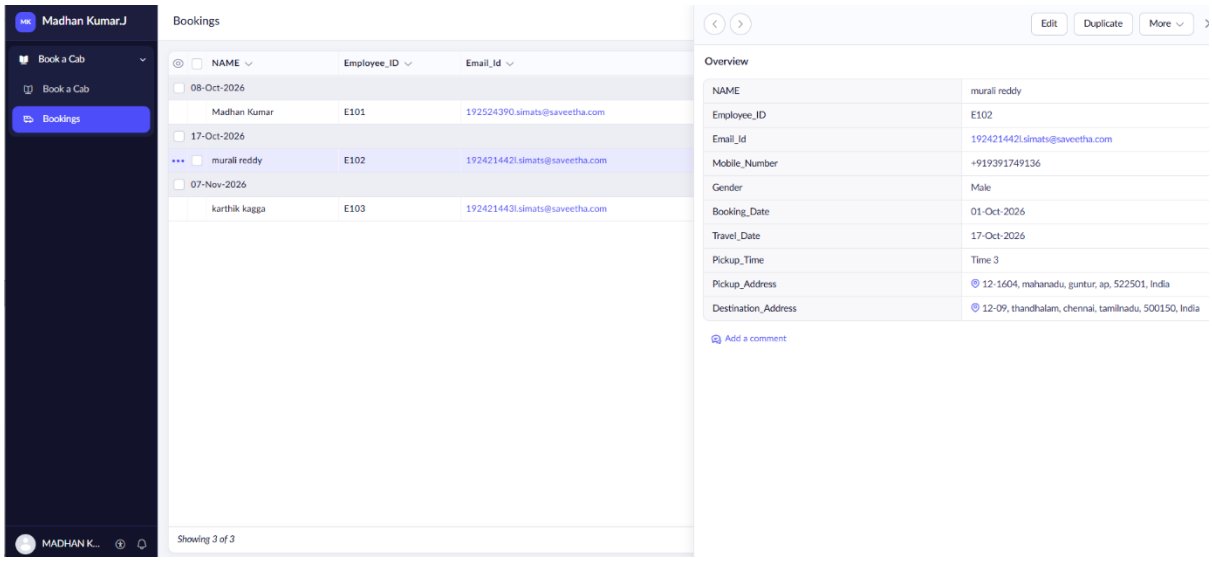

Procedure

1. Access the Zoho One cloud platform using valid login credentials.
2. Navigate to the Zoho Creator application from the Zoho One dashboard.
3. Start a new application and name it **Car Booking Reservation System**.
4. Create a form to collect car booking and reservation information.
5. Add necessary fields such as pickup location, destination, rental type, outstation, package type, and duration.
6. Select suitable field types, such as dropdowns, text fields, and number fields.
7. Customize the form layout to make it simple and user-friendly.
8. Configure the form settings and save the application.
9. Publish the application to make the booking form accessible to users.
10. Fill in the form with sample car reservation details.
11. Submit the booking information and check whether the records are saved correctly in the cloud database.
12. Perform multiple booking tests to ensure the system operates properly as a Software as a Service (SaaS) application.

Implementation Input:

Output:

Result

Thus, a **Car Booking Reservation System** was successfully created using **Zoho One** and demonstrated as a **Software as a Service (SaaS)** application.
