Experiment -11

ONLINE SUPERMARKET USING CLOUD (SaaS)

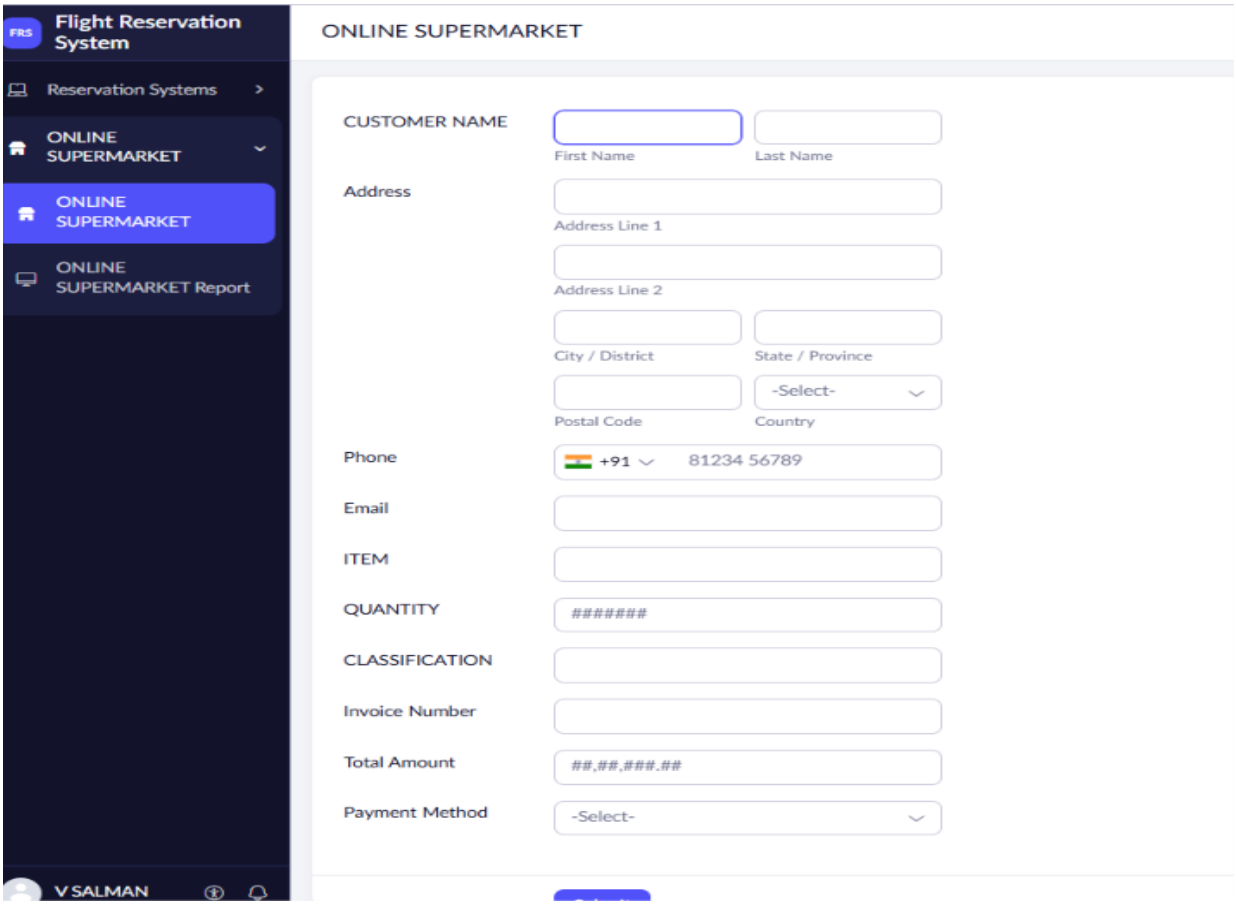

Aim

To create a simple cloud software application for an **Online Supermarket** using any Cloud Service Provider to demonstrate SaaS..

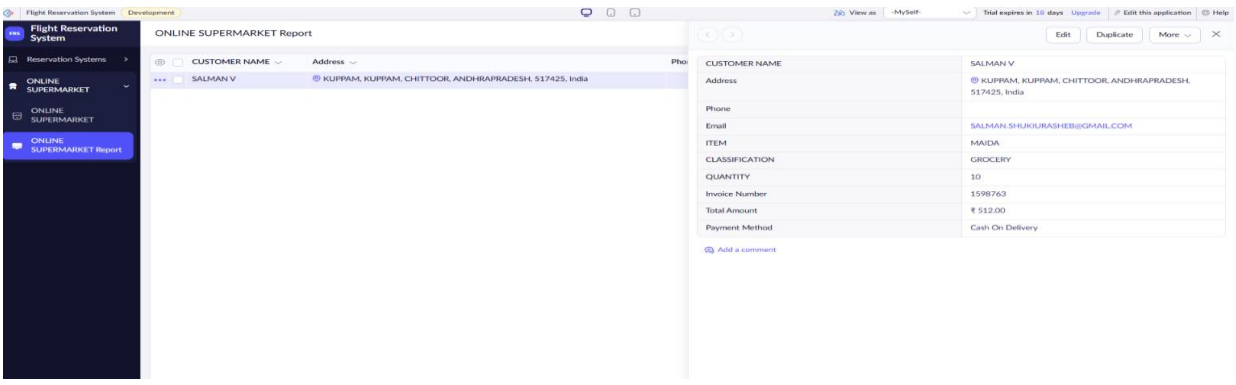

Procedure

1. Log in to the Cloud Service Provider.
2. Create a new application for Online Supermarket.
3. Create a customer and item form.
4. Add the required fields:
    a. Customer Name
    b. Address
    c. Phone
    d. Email
    e. Item
    f. Quantity
5. Configure suitable field types.
6. Create the item classification form.
7. Add product categories and item details.
8. Design and arrange the application.
9. Save and publish the application.
10. Enter sample customer and item details.
11. Submit the form and verify that the information is stored in the cloud.
12. Test the application with different items and quantities.

Implementation Input:

Output:

Result

Thus, an **Online Supermarket application** was successfully created using a Cloud Service Provider and demonstrated as a SaaS application.
